## WANMO SCS/ZCS-120tD

Axle Laden Modularize Series Digital Electronic Portable Steel Truck Scale

- Rated weight : 120 T
- MAX overload safety: 125% FS
- Allowable axle load : 60 T
- Playing surface size : 18000mm (L) × 3000mm (W)
- Structure: 3 section weighing platform 6-6-6 U-Shape cold pressing quality steel welded construction deck plate 12 m / m end plate 18 m / m U-Shape steel 6 m / m
- Underlying form : footless pit /shallow foundation ditch
- Precision : OIML III grade
- Electric power source: 220VAC (-15%~+10%) , 50HZ±2%

### SENSOR TECHNICAL TARGET

The sensor uses the fire-new weigh idea, it is the sensor up to date in the world. Every digital electronic weigh sensor all be owned the A/D transducer and digital signal output interface .ZSF-A-D digital electronic weigh sensor is used package sealing with laser .And all the products are made of 100% stainless steel material.

### DIGITAL WEIGHING DATA TERMINAL ( D2002E ):

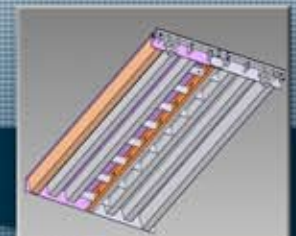

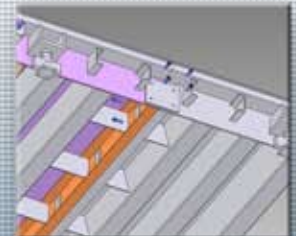

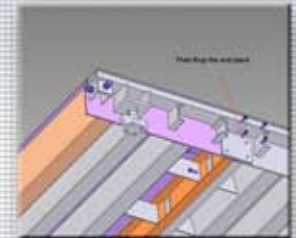

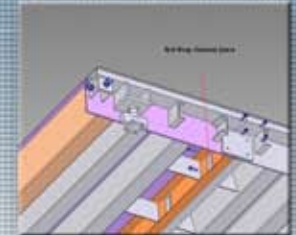

- Automatic follow display usage of gross weight and net weight can be change
- Date and time can input and display from the keyboard
- Automatic diagnosis
- Weight number can be input, display and print once completed cargo weighing

## FUNCTION

- The weight of goods or haulage vehicle which be weighed to transform the number of weight directly.
- Calibration and setting of keyboard;
- With zero position ,Kg, gross weight, net weight and tare cursor etc. to show the weigh state ;
- EMS memory power-off protection;
- According materials classification to subtotal and total, then cumulative weight ;
- Weighing sequence number (CN) ;
- Standard layout PQ-30 printer ;
- It can print gross weight , net weight , tare cursor, time, date, mark NO. ID and sequence number CN to long-stem storage ;
- Configurable large screen display for remote reading.

## WANMO SCS/120

### Analog Type Portable Steel Truck Scale

SCS series static analog type Portable Steel Truck Scale , use the up-to-date technology to produce the sensor and the digital weighing indicator, it can be used in many different weighing situation, and this product is spread all over the world. The analog type Portable Steel Truck Scale to achieve modularize、seriation and standardization, steel structure weighing platform use the U-shape section roll formed shape welding, whole steel-plated、torsional property、arts and crafts of integral construction is advance, and it can be assembled allodially for any specification platform.
